Instructions

- Use **black** ink or ball-point pen.
- Fill in the boxes at the top of this page with your name, centre number and candidate number.
- Sign the declaration.
- Answer **all** questions.
- Write your final answers in the boxes provided.
- Answer the questions in the spaces provided there may be more space than you need.
- You **must** show clearly how you get your answers in the spaces provided. Marks will be awarded for your working out.
- Check your working and your answers at each stage.
- Diagrams are **not** accurately drawn, unless otherwise indicated.
- If your calculator does not have a π button take the value of π to be 3.14
- Calculators may be used.

Information

- The total mark for this section is 48
- The total mark for this paper is 64
- The marks for each question are shown in brackets – use this as a guide as to how much time to spend on each question.
- This sign \checkmark shows where marks will be awarded for showing your checks.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

6 Mai has this information about 100 flowering plants in her shop.

		Stem length		
		Short	Long	
Size of flower	Small	10	18	
	Large	43	29	

She will take a plant at random from these plants.

(a) Work out the probability that this plant will have a large flower and a long stem.

Mai will take at random a plant from the 72 plants that have a large flower.

(b) Work out the probability that this plant will have a short stem.

7 Sal works in a dress shop.

She wants to know how well the labels on the dress hangers agree with the true size of the dresses.

The table shows information about some hangers and dresses.

			True size of dress				
		10	12	14	16	18	
	10	8	2	1	1	_	
	12	_	9	3	1	2	
Label on hanger	14	2	1	12	_	_	
	16	1	_	1	13	2	
	18	1	1	2	1	13	
	Totals	12	13	19	16	17	

Sal thinks that 2 in every 7 dresses are on hangers with the wrong label.

Is Sal correct?

Show clearly why you think this.

B James has a contract to paint 30 identical water tanks.He has to paint the outside surfaces of each tank, but not the top.

Each surface is rectangular.

James knows that 1 tin of paint

- is enough to cover 12 m² of surface
- costs £26.99

Work out the total cost of the tins of paint he will need for all 30 water tanks.
